SUMMARY

Product Manager who builds B2B and B2C products end to end, with 0-to-1 launches across growth, automation and workflow products. Currently in energy tech, owning a consumer app, a partner platform and the integration that turned partners into the main acquisition channel. Prototype-led and data-driven; previously 11 years running audio production teams and a studio.

EXPERIENCE

WATT WEALTH ENERGY (DSEG) – B2B2C solar & battery platform, Sweden **Sep 2025 – Present**
Product Manager *Bengaluru, India*

Own product across the consumer app (WattWealth), B2B partner platform and field app (SolSwift), and the acquisition website.

- Turned the installer partner channel into the main acquisition engine, lifting partner-sourced sign-ups **from 0% to 96% of new users** and **doubling monthly onboarding** after launch, by auto-creating customer accounts from partner quotes.
- Led a full redesign of the consumer app from a passive usage readout into a daily decision tool (live usage, pricing, savings, self-service documents) as the **user base grew 6x**, validating flows with working prototypes before build.
- Launched 0-to-1 automation that schedules home batteries around electricity prices, with **90% of users keeping it on**, by turning price and usage forecasts into an editable daily plan and resolving user-override edge cases with engineering.
- Made product value visible to drive retention, shipping a savings view (forecast vs. actual) where **every user with 30+ days of data saved money** and the software drives **~44% of their total savings**.
- Expanded the B2B partner platform from quoting to end-to-end project management and gave partners direct support access to customer accounts, as the **partner network more than doubled (~20 added)** and **quarterly quote volume tripled**.
- **Removed a manual onboarding bottleneck** with self-serve sign-up, shipped through a prototype-led process: Lovable prototypes to test flows and edge cases, Figma iteration with design, and engineering scoping of effort and trade-offs.

FREECOMERS – Social platform for filmmakers **Jun 2025 – Sep 2025**
Product Manager (Intern) *Bengaluru, India*

- Increased **engagement 75%** and grew the **user base 22%** by revamping core journeys and onboarding from **100+ user interviews** and launching Jobs & Projects (**35% feature adoption**).
- Launched a mentorship MVP as product owner, prototyped in Lovable with Razorpay payments and Google Meet booking.

POCKET FM – Audio storytelling platform **Jul 2021 – Oct 2024**
Lead Engineer (Audio) *Bengaluru, India*

- Scaled acquisition content to **1,500+ assets** for Meta and YouTube by leading a **22-person** team and introducing AI-assisted workflows that improved efficiency **35%**.
- Increased **retention 180%** by redesigning content strategy and SOPs across a high-volume production pipeline.

ELEVEN GAUGE RECORDINGS – Music production studio **Aug 2014 – Jun 2025**
Founder & Creative Producer *Bengaluru, India*

- Grew the studio **4x** over 8 years into a **Top 12** Indian studio (**200+ projects**, 20+ genres, **3.5M+ streams**, **85% repeat clients**); produced Grammy long-listed content.

PROJECTS

VibeCheck – mood-based music discovery feature (prototype, PRD) | **Game Level Flow Explorer** (Python) – player-progression analytics tool (app)

EDUCATION

Product Management Launchpad, Upraised (2025) | Recording Arts & Live Sound (2014) | B.E. Biotechnology, PES Institute of Technology, Bengaluru (2013)

SKILLS

Product: Product Discovery, User Interviews, PRDs, User Journeys, Prototyping, Roadmapping, Prioritisation, Growth & Activation, B2B2C Platforms

Tools: Lovable, Figma, JIRA, Miro

Domain: Residential Solar, Battery Optimisation, Spot-Price Electricity Markets, Installer (EPC) Workflows
